Micron is Now a Partner of ACROSS Global Alliance

Micron, Inc. (Head office: Tokyo, President: Michita Sato) announced that it has become a partner of ACROSS Global Alliance Pte. Ltd. (Head office: Singapore, Chairman-Executive Committee: Steven Bukvic), a global alliance of clinical research organizations (CROs) and specialist service providers. Micron will be providing imaging core lab services throughout Asia and providing CRO services in Japan.

ACROSS Global Alliance Pte. Ltd. (ACROSS) is a global organization of approximately 2,700 professionals from over 20 CROs and specialist service providers offering full-service clinical trial solutions such as clinical monitoring, medical imaging, site management, project management, bio statistics & data management, pharmacovigilance, medical writing, and quality assurance, etc. to pharmaceutical companies and biotech companies. ACROSS Partners cover 99 countries and provide clients with access to more than 6,000 study sites and an almost endless number of potential clinical trial subjects. The well-balanced combination of local knowledge, globally experienced professionals, and the latest technology allows clients to conduct faster, more cost-effective studies without sacrificing quality.

By being a partner of ACROSS, Micron is ready to provide various kinds of high-quality, state-of-the-art services for clinical trials. We believe our extensive expertise and unique services developed by the experience of Asian studies will benefit the clients and strengthen ACROSS's presence in Asia. Utilizing our experience, Micron will actively participate in global studies by offering imaging core lab services, monitoring services, etc.

ACROSS Global Alliance Pte. Ltd.

ACROSS Global is a strategic alliance of clinical research organizations (CRO) and specialized service providers that extends across the world. Its CRO members cover 99 countries and provides access to more than 6,000 study sites and an almost endless number of potential clinical trial subjects. ACROSS' 2,700+ employees are fully dedicated to the highest standards of conducting cost-effective clinical trials across the globe. ACROSS Global makes global studies seamless for both small and midsize pharma and biotech firms.

Micron, Inc.

Micron is an imaging CRO that provides central imaging review, image data analysis, monitoring, quality control, PET tracer manufacturing support, and facility management for multicenter clinical trials. We also support the development of imaging biomarkers so that we are also involved in the introduction of image analysis software as a medical device to the Japanese market.
