### **Announcement of Partnership Agreement with Global Regulatory Partners**

Micron, Inc. (Head Office: Tokyo) is pleased to announce that it has reached an agreement with Global Regulatory Partners, Inc. (GRP) (Head Office: Massachusetts, USA) to establish a mutually cooperative business partnership, especially in the clinical development of radiopharmaceuticals, in order to promote the business of both companies by leveraging their respective strengths and services.

GRP provides a wide range of regulatory, clinical trial, quality and safety consulting services to medical device and pharmaceutical companies worldwide. The Japanese subsidiary was established in October 2016 to support foreign medical device and pharmaceutical companies entering the Japanese market. They also provide support services for Japanese companies entering the U.S. market.

Micron conducts various activities as the only CRO in Japan that can provide comprehensive support for clinical trials using medical imaging, including not only image analysis services in the clinical development of pharmaceuticals and medical devices, but also for clinical research and investigator-initiated clinical trials, imaging biomarker developments, image analysis software distribution, and PET manufacturing facility establishment. We have a high level of expertise in the clinical development of radiopharmaceuticals since our founding.

Through this partnership, we will further strengthen our clinical trial implementation system not only for Japanese domestic companies but also for overseas companies.
