**Micron Announces a Distribution Agreement  
for a Software as a Medical Device in Taiwan**

Micron, Inc. (Head Office: Tokyo, President: Michita Sato), which provides support services for medical imaging technology and clinical trials, is pleased to announce that it has signed the first distributor agreement outside of Japan for its brain imaging analysis software, PMAneo, with Getz Bros & Co. (BVI), Inc., Taiwan Branch (Taiwan Headquarters: Zhongshan District, Taipei City Managing Director: Sting Wu et seq., Getz Taiwan).

Under this Agreement, Getz Taiwan will distribute PMAneo in Taiwan and will prepare for an early launch. In recent years, as well as in Taiwan, there have been many efforts to automatically process image data, calculate quantitative values, and utilize these values as indicators (imaging biomarkers) of clinical conditions and therapeutic effects, and we have already received requests from several doctors. PMAneo will be distributed to medical institutions in all regions of Taiwan through Getz Taiwan.

PMAneo

Taiwan Food and Drug Administration (TFDA) registered medical device. Product Name: “邁科隆”醫學圖像分析軟體/“Micron” PMAneo Medical Images Analysis Software (License Number. 035782). PMAneo is an application that uses MRI diffusion-weighted imaging (DWI)/MR perfusion imaging (PWI) or CT perfusion imaging (CTP) to provide information for treatment decisions, evaluations, or diagnoses related to clinical conditions. This fully automated brain image analysis software measures low ADC value areas from DWI, and computes CBF, CBV, and Tmax from PWI or CTP. It also calculates and displays the volume of cerebral hypoperfusion areas and the mismatch volume and ratio between them.

Getz Bros & Co. (BVI), Inc.

Founded in 1852 as a grocery distributor in the United States, the company has since expanded into healthcare and life sciences, functional materials and industrial products, telecommunications and logistics services. The expansion into the ASEAN region began in 1905, and the group's headquarters functions were relocated to Singapore. It now has offices in 10 countries.

### Getz Taiwan

Since its founding in 1952, the company has been providing services in Taiwan with deep experience in multiple health care areas, including cardiovascular, peripheral intervention, cardiology, microstructural surgery, plastic surgery and human brain mapping. The company has a total of 4 locations, including Taipei and Taichung, as well as Kaohsiung and Chiayi. As the pioneer medical technology distributor in Taiwan, it strives to raise the standard and quality of medical services by providing cutting-edge medical technologies and solutions.

Micron, as a CRO supporting the development of pharmaceuticals and medical devices, provides development support services, and the manufacturing and sales of SaMD (Software as a Medical Device) products. In particular, we have assisted over 30 SaMD products in obtaining approvals and certifications, including those that are still ongoing.

With Taiwan as a foothold, we are preparing to expand sales of SaMD products in a different global market in order to globally develop medical devices originating from Japan in the future with the support of JETRO (Japan External Trade Organization).

Micron also provides sales support for SaMD products to foreign companies seeking sales channels in Japan.

Micron will use its experience to support the development of SaMD products, and will seek to generate synergies in the CRO business.

### **Micron, Inc. Company Information**

Head Office	3-13-16 Mita, Minato-ku, Tokyo, Japan
Business Scope	<ul style="list-style-type: none"><li>- Supports the development of pharmaceuticals, diagnostics, medical devices, biomarkers, and AI guided SaMD by utilizing imaging technologies</li><li>- Clinical development support (monitoring, quality control, imaging core lab, image analysis, central imaging review, etc.)</li><li>- PET tracer manufacturing support</li><li>- Consulting for clinical development</li><li>- Second-class marketing license for medical devices</li><li>- ICCC services</li></ul>
