Micron, Inc.

Press Release

Selected as a Finalist for the Best Contract Research Organization Award at the Citeline Japan Awards 2025

Tokyo, Japan – Micron, Inc. (Headquarters: Minato-ku, Tokyo) is pleased to announce that we have once again been selected as a finalist for the Best Contract Research Organization (Best CRO) award at the Citeline Japan Awards 2025.

The Citeline Japan Awards (<https://www.citeline.com/en/awards/citelinejapanawards>) is the Japanese edition of the globally recognized Scrip Awards, which has been held in the UK for over 20 years. Now in its fourth year, the program celebrates innovation and excellence within Japan's pharmaceutical and biotech industries—recognizing companies contributing to the country's evolving role in global healthcare.

Since our founding in 2005, Micron has grown into a leading Imaging CRO, delivering integrated imaging solutions that support both pharmaceutical and medical device development. In recent years, we have steadily expanded our capabilities in Software as a Medical Device (SaMD), Theranostics, and PET imaging, while strengthening partnerships with domestic and international sponsors. These efforts have contributed to greater trial efficiency, improved data reliability, and supported the use of imaging biomarkers in clinical development.

Through these initiatives, Micron continues to connect global innovation with Japan's clinical development ecosystem, providing science-driven support that accelerates the development of pharmaceuticals and medical devices worldwide.
